

Table 2 (extended version). Mean percentage (rounded to one decimal) of words used in a tutorial dialogue for all codes per coding category in both the reporting and analysis phase of diagnostic reasoning and number of TDs in which they occurred.

	Phase of reporting of diagnostic reasoning		Phase of analysis of diagnostic reasoning		Total	
	% words (range)	In N TDs	% words (range)	In N TDs	% words	In N TDs
Diagnostic reasoning	17.1 (0.0-35.7)	16	49.1 (22.5-75.4)	17	66.2	17
